SUMMARY

Motivated Information Technology student with a strong interest in Artificial Intelligence, Machine Learning, and Software Development. Skilled in Python, Data Structures & Algorithms, NumPy, Pandas, and Machine Learning fundamentals. Passionate about building real-world projects, solving problems, and continuously learning new technologies. Seeking opportunities to apply technical skills and contribute to innovative AI-driven solutions.

EDUCATION

Bachelor of Technology (B.Tech), Dr. A.P.J. Abdul Kalam Technical University (AKTU) 10/2023 – 07/2027
Kanpur,India

SKILLS

: Programming Languages: Python,C++,JavaScript,C | **: Data Structures & Algorithms:** Problem Solving | **: Machine Learning & Data Analysis:**• NumPy, Pandas, Matplot, Seaborn, Scikit-learn, Machine Learning models, Deep learning Fundamentals |
: Databases: Mysql,Supabase | **: Web & Development Tools:** Streamlit Git GitHub | **: AI:**RAG (Learning), Agentic AI (Learning) |
: Core Concepts:Data Structures & Algorithms, OOP, Problem Solving

COURSES

Prime: AI/ML Batch, Apna College 11/2025 – 04/2026
kanpur,India

PROJECTS

AI-voice-face-attendance 03/2026 – 03/2026

Technologies: Python, Streamlit, OpenCV, Face Recognition, Librosa, Supabase
Developed an attendance management system using face recognition and voice verification. Built an interactive web interface using Streamlit. Integrated Supabase for storing student records and attendance data.

House Price Prediction 11/2025 – 11/2025

Built a machine learning model to predict house prices using historical housing data. Performed data preprocessing, feature selection, and model evaluation. Applied regression algorithms using Scikit-learn.Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib.

Water Fault Management System 04/2025 – 04/2025

Built a smart water fault management platform for reporting and monitoring water supply issues.Developed modules for fault registration, status tracking, and data analysis.Improved issue management through centralized data storage and automated workflows.Created dashboards for monitoring fault reports and system performance.

Chess Game 07/2024 – 07/2024

Developed a fully functional Chess game implementing standard chess rules and piece movements. Designed game logic for move validation, check detection, and game state management. Applied Object-Oriented Programming principles to model chess pieces and board interactions. Created an interactive user interface for gameplay and move tracking. Technologies: Python, OOP, Data Structures & Algorithms.

ACHIEVEMENTS

Solved 450+ Data Structures & Algorithms problems across coding platforms.
Maintained a CGPA of 8.1/10.0 in B.Tech
Built multiple projects including an AI Voice & Face Attendance System, Water Fault Management System, and Chess Game.
Active problem solver on LeetCode and GFG .
